

# ONLINE WEBINAR

Join the PRO-COAST online webinar series exploring tools for Transformative Change in coastal communities.

**Dates:** 21st January - 18th March 2026

## Webinar 2: **Conservation & Human Use Index (CHUI)**

**Main speaker:** Phoebe Vayanou

**Date:** 18th February 2026

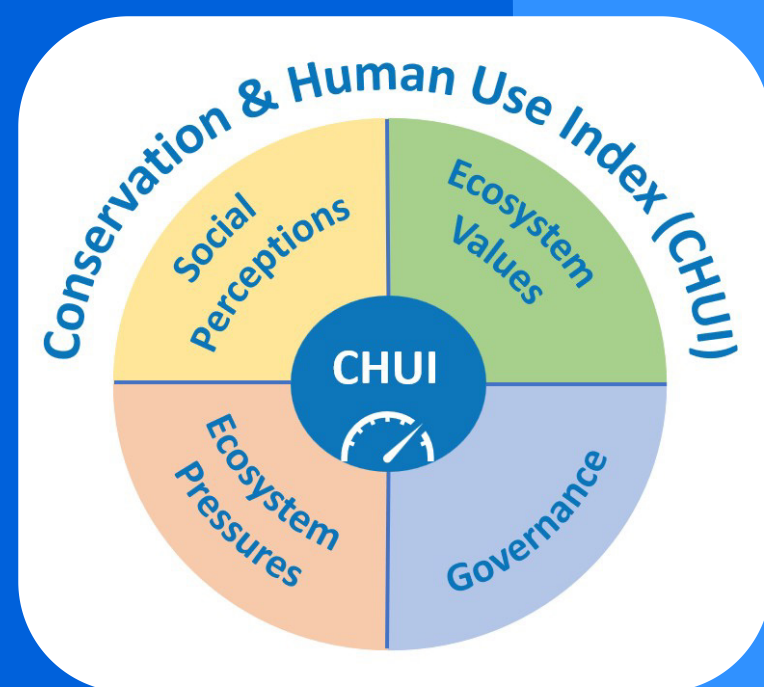

**Time:** 14:00 - 15:00 CET

Join our upcoming webinar to explore the **Conservation and Human Use Index (CHUI)**, an innovative tool designed to assess the **balance between biodiversity conservation and human use** in coastal areas.

The index is designed for use by **conservation practitioners, local authorities, stakeholders, and community leaders** involved in the management of coastal areas.

This workshop will present how the Index identifies conflicts and synergies, how it can be applied in different contexts, and empower stakeholders to collaborate and guide positive change in their community.

By combining ecological, governance, and community perspectives, the **Index highlights strengths, pressures, and opportunities for action in a clear and practical way.**
